Connecting PS3 Controller:

Needed:
PS3/PS4 Controllers
Mac
Joystick Mapper

Tested on - macOS Sierra

Step 1:

Turn bluetooth on (on mac).

Using a usb connect the controller to the computer.

Get a paperclip and reset the controller. reset button located on the back of the controller. (hold button for 2 seconds)

PS3 Controller will show up in bluetooth preferences. It should try to auto connect.

Disconnect the controllers after pairing it successfully

Download Joystick Mapper from app strore.

Add a new preset.

Now you can add both controllers and select the keys on the controllers by either selecting it manually or scanning keys.
